Project Proposal: Anime Mini Wiki Website

1. Project Overview

Anime is a popular form of entertainment worldwide, but many beginners lack a simple and organized platform to understand its basics. The **Anime Mini Wiki** website is designed to provide clear and structured information about anime, including its history, genres, popular titles, and major studios.

2. Problem Statement

Most anime information websites are either too detailed or cluttered, making it difficult for new users to learn. This project solves that problem by offering a clean, easy-to-navigate website that presents essential anime knowledge in a simple way.

3. Aim

The aim of this project is to develop a user-friendly informational website that introduces users to anime and its industry.

4. Objectives

- To design a multi-page anime information website
- To explain anime history, genres, and studios
- To ensure easy navigation and clean layout
- To collect user feedback through a form

5. Tools Used

- HTML
- CSS
- Visual Studio Code
- Web Browser

6. Conclusion

The Anime Mini Wiki website provides a simple and effective way for users to learn about anime while demonstrating basic web development skills and good design practices.
